

## IN 2015...

Uber, the world's largest taxi company, owns no vehicles

Facebook, the world's most popular media provider, creates no content

Alibaba, the world's most valuable retailer, has no stock inventory

Airbnb, the world's largest accommodation provider, owns no real estate

Something interesting is happening.

A laser sensor scans 360 degrees around the vehicle for objects.

A processor reads the data and regulates vehicle behavior.

Radar measures the speed of vehicles ahead.

An orientation sensor tracks the car's motion and balance.

A wheel-hub sensor detects the number of rotations to help determine the car's location.
